

International Sustainable Use of Natural Resources

NR350 (4 tech elective credits)

Summer Course: Turkey

June 22 – July 17, 2009

Istanbul and environs – 8 days

Trabzon and environs — 10 days

Antalya and environs – 10 days

Scholarships support DFER students
in good academic standing.

Examine effects of land and resource
management through ages of cultural
change.

Observe the effects of terrain on
climate, soils, vegetation and faunal
habitat types.

Consider global economic and social
impacts on resource sustainability.

Interact with Swedish and Purdue
University students and faculty in an
interdisciplinary course crossing
cultural and disciplinary boundaries.
