# REPORT FROM THE PRESIDENT

If the average tenure of a CEO in industry is 6.5 years, Paper Science & Engineering at NC State is now supplying the seventh generation of industry leaders. Our 1,500+ graduates are located throughout the world and 75% of those graduates remain directly associated with the paper industry.

**As you will discover in this 57th Annual Report, Paper Science & Engineering is thriving at NC State locally responsive and globally engaged.**

## **Sustainability.**

The theme of the 57th annual meeting of the Pulp and Paper Foundation is *sustainability*. The word is derived from the Latin *sustinere* (meaning to last or endure). Over the past few years the word has been used more and more in our industrial global society to indicate that an industry is working hard to remain viable into the future. Paper Science & Engineering at NC State has demonstrated its sustainability through the years because of its partners, the capabilities of paper industry, the potential of our raw material and products and the performance of our students.

**Our Partners.** Perhaps the key partner supporting the Paper Science & Engineering program is NC State University's College of Natural Resources because an academic program can be no stronger than its supporting college and university.

A second key partner supporting Paper Science & Engineering at NC State is the NC State Pulp and Paper Foundation. Organized in 1954 by several paper companies with pulp and paper mills in the southeast U.S., the Foundation includes both corporate and individual members. Financial accounts reside within NC State Natural Resources Foundation Inc. and are restricted to benefit Paper Science & Engineering.

The primary purpose of the Foundation is to provide

financial assistance in the form of scholarships, foreign travel assistance, internships etc. to qualified students who are enrolled in Paper Science & Engineering. The goal is to enable the Paper Science & Engineering program at NC State to be the best of its kind.

For the year ending June 30, 2011 the Foundation had 10 Corporate Members and 11 Corporate Contributors. Corporate and Individual gifts totaled \$170,953 for the fiscal year ending June 30, 2011.

The Foundation's Operating Guidelines have been reviewed; the biggest change is that all

board members and committee members will be current donors to the Foundation. And the Foundation volunteers will take a more active role in increasing the number and size of annual gifts to support scholarships through a new initiative, **Committee of 100**. The goal of this initiative is to identify 100 people who will commit to a gift of \$1,000 per year for 5 years to support Paper Science scholarships.

**The Paper Industry.** When the Paper Science program began in the 1950's everyone understood the definition of the paper industry. Today's definition of the paper industry includes much more than a traditional pulp and paper-making operation or direct supplier to the mill. Consulting energy bio-processing companies are also part of the industry base. And for the graduates from the Paper Science & Engineering program at NC State the job opportunities are much wider than traditional paper. Our graduates, as a testimony to the value of the education at NC State, have enjoyed successful careers in government, medicine and telecom. The Paper Science program prepares an outstanding engineering-oriented graduate for a career in any field.

The near-term outlook for jobs for our students is good. New companies in the bio field are recruiting our students as are the traditional paper companies. Our most recent graduates had multiple job offers, although the demand

Continued on page 4

for summer work was down this year compared to past years.

You will read elsewhere in this report about the biannual trip our students take to visit international mills. This year the destination was Brazil. Older graduates of the program will remember when the senior trip went north – to Virginia or south – to South Carolina. The target job market for our students is now world-wide.

### **The Potential of our Raw Materials and Products.**

The Paper Industry was in the sustainability phase long before it became fashionable. The industry was a leader in recycling its raw materials decades before the “Green Movement”. The chemical recovery process and the

recovery of heat for energy during the process had been in widespread use long before I entered the industry in 1965. From then until now the Paper Industry has continually looked for better ways to fully utilize the raw materials. Perhaps the most exciting element supporting the sustainability for our program is the potential for new products. We’ve only scratched the surface of the possibilities for products that improve society that are manufactured from sustainable raw materials after discovery by our students.

David Hickman – President and Charter Member of the Committee of 100

### **The Performance of our Students.**

The key to the long term success of Paper Science & Engineering at NC State is the quality of students and their performance in the marketplace. The program continues to be attractive to incoming students and industry reports on their performance as interns and permanent employees is very positive. During the coming year, look for alumni highlights in the College’s online newsletter which is published every other month.

I have enjoyed serving as President of the NC State Pulp and Paper Foundation and look forward to continued reports of success. Thank you for your support and for your contributions. I feel certain that the state legislature will continue to cut funding for North Carolina’s university system. Tuition will continue to increase to partially offset the legislative cuts; therefore additional giving by friends and alumni is necessary if the program is to remain the premier engineering value on NC State’s campus. Please join with me and become a member of the **Committee of 100.**

***Outgoing President  
David Hickman  
welcomes incoming  
President Ronnie Hise***

# REPORT FROM THE EXECUTIVE DIRECTOR

**Y**ou've probably seen the phrase "We live in uncertain economic times ..." so often that you are sick of it. So, I won't repeat it but it is true. NC State Natural Resources Foundation, Inc. and its advisory committees and the College of Natural Resources and its departments are making a slow recovery from the recession. The economic downturn continued to depress placement opportunities for many of our students, hampered our fund-raising efforts and through state and Foundation budget cuts, decreased the college's ability to deliver Academic and Extension programs. Our position as a premier College of Natural Resources continues to expand however given a strong and growing enrollment, research and outreach leadership, innovation, as well as continuing to graduate highly desired professionals. The mid- to long-term job prospects for the students in each of our departments remain strong, even exceptional given the many upcoming retirements in private industry and government agencies. Our enrollment continues to grow with an 11% increase in 2010-11; 19% for graduates and 9% for undergraduates. Our extramural grant support continues to increase with 58% more proposals and 38% more awards (dollar amount) this year; our industrial co-ops are expanding and new technology has allowed our Extension Specialists to reach larger audiences with less expense.

Paper Science & Engineering is one of the key programs in the College of Natural Resources thanks in large part to the support of the Pulp and Paper Foundation. As you can see from the following table, cash flow for the program remained positive for the fiscal year ending June 30, 2011. Note that the outgoing cash for scholarships remained significantly down from the almost \$325,000 paid out in 2009. Thus far, the reduced scholarship (\$2,500 per year) has not decreased enrollment in the program.

## Looking Ahead to FY 2012

The current fiscal year which ends June 30, 2012 promises to be as unpredictable as the past three years; in addition

David Ashcraft

to the uncertain economy and the possibility of another recession, there are several threats and opportunities internal to NC State:

**Opportunity – Increase Gifts from Individuals.** At the 2010 Annual Meeting the Board voted to create the **Committee of 100**, one hundred people who would pledge to give \$1,000 per year for five years to Paper Science Scholarships. As of August 1, the number of people pledging is 27. When all 100 pledges are in place an additional \$100,000 per year will be available for the program. Assuming corporate gifts

remain at \$150,000 and earnings from the endowed scholarships return to the \$250,000 level scholarships for Paper Science will total \$400,000 per year. Sustaining the gifts from the **Committee of 100** and maintaining the corporate giving are crucial to the continued success of Paper Science. A renewed and active board and operating committees will be key to the success of the **Committee of 100**. The Operating Guidelines for the Foundation have been reviewed and will be followed as the Foundation assumes the responsibility for raising annual gifts. The major change is that all board and committee members will be financial contributors to the Foundation. It is important that those who are encouraging others to give are themselves givers.

**Opportunity – Fund Raising Campaign to increase the Endowments.** The next major fund raising campaign for NC State will be announced in March 2012. This campaign, unlike the last one, will focus on increasing the size and number of endowments and will not end until 2020. Development Officers in our College and throughout the University will concentrate on raising major gifts rather than annual giving while the Office of Annual Giving and college/department advisory committees concentrate on annual giving.

**Threat – Restructuring Realignment and Budget Cuts.** NC State University will be making major changes during the next fiscal year as a result of budget cuts and the

Continued on page 6

resulting need to realign some colleges and departments and centralize business functions across the University. The College of Natural Resources will be impacted by the

changes but we will not know any details until later in the year. Although change is disruptive, Paper Science & Engineering will survive as a strong program.

### Cash Flow NC State Pulp and Paper Foundation

(Fiscal Year ending June 30 2011)

Cash In	2009	2010	2011
Memberships and Annual Giving	\$184,322	\$169,298	\$170,953
Paper International Experience	28,157	0	28,561
Annual Meeting	36,100	2,180	23,270

## NC State Pulp and Paper Foundation

### Board Meeting

October 1, 2010

#### Minutes

The Advisory Board of Directors for the NC State Pulp and Paper Foundation was called to order at 7:35 am on October 2, 2010. The President of the Foundation Mr. David Hickman welcomed attendees and reminded attendees of the Foundation's antitrust policy.

#### Attendees included:

Mr. Tim Corey International Paper  
Mr. Rex Robertson Metso  
Mr. Jack Lowdermilk Ashland Hercules  
Mr. Tom Norton Rayonier  
Mr. CA Thornton Rayonier  
Mr. Bart Nicholson Domtar  
Mr. Bill Rogers GP  
Mr. Gray Carter Buckeye Technologies  
Dr. Ronnie Hise MeadWestvaco  
Ms. Camille Kump MeadWestvaco  
Mr. Gus Cottros NC State  
Dr. Steve Kelley NC State  
Dr. Bob Brown NC State  
Ms Jennifer Catalano NC State  
Mr. David Ashcraft

Dr. Hise noted that the minutes did not reflect the expiration dates for individual board members. (The Operating Guidelines state that directors will serve a three year rotating term of office and may be reelected once.) Mr. Hickman asked Mr. Ashcraft to assign term of office to the existing directors; approval at the next board meeting.

Mr. Ashcraft then reviewed the cash flow projection for FY 2011 and noted that revenues and expenses are projected to increase resulting in a positive cash flow of \$28,000.

Mr. Hickman then asked Dr. Steve Kelley to present the Paper Science and Engineering report. Dr. Kelley noted that the jobs are plentiful and the number of students enrolling is good, although the source of the students has changed from mill town recruiting to on campus transfers. The major problem is the small number of new out-of-state students. With the elimination of the full-ride scholarship for out-of-state students the number of out of state students, is only about 9% of the total students enrolled in Paper Science.

Dr. Kelley's presentation led to a discussion on ways to increase out of state students. Board consensus indicated a strong preference for the program at NC State to maintain its regionality. Dr. Ronnie Hise made a motion seconded by Mr. Gray Carter that the Paper Science program at NC State maintain a regional focus. The motion passed unanimously.

Mr. Hickman then charged the two board committees to work on two specific items in the subsequent committee meeting:

- A plan to increase annual giving by \$100,000
- A plan to increase the involvement of local mills in the scholarship selection process

The Advisory Committee Board meeting adjourned at 8:30 am.

Minutes recorded by: David Ashcraft

## NC State Pulp and Paper Foundation Advisory Committee Board Meeting

March 31, 2011

#### Minutes

Mr. Hickman called the board meeting to order and asked attendees for a self introduction.

#### Attendees included:

##### Advisory Board Members

David Hickman – Thiele President  
Lou Boos – Nordic Engineering Past President  
Steve Kelley – NCSU Department Head Forest Biomaterials  
Rob Quarles – Buckman Laboratories  
Gray Carter – Buckeye Technologies  
Tim Corey – International Paper  
Greg Fullenwider – Domtar  
Bill Rogers – Georgia Pacific

#### Others

Jim Thompson – Talo Analytic  
Ernie Alexander – NCSU CNR Development  
Gus Cottros – NCSU CNR Development  
Patti Woodbury – NCSU CNR Development  
Med Byrd – NCSU Forest Biomaterials  
Katie McIntyre – NCSU Forest Biomaterials  
Bob Patterson – Kapstone Paper  
Mr. David Ashcraft – NCSU Executive Director

**NC State and Forest Biomaterials Update** – Steve Kelley  
Dr. Steve Kelley shared the status of Strategic Planning by the University, state budget projections, the Chancellor's Task Force on Strategic Realignment and the potential impact on the Paper Science and Engineering program.

- **Strategic Planning.** This process is conducted every three years and a DRAFT plan is posted on the university's website ([www.ncsu.edu](http://www.ncsu.edu)).
- **Budget Planning.** Projected cuts in state funding are expected to be 10-20%. These decisions will be

made by the legislature in July. The College of Natural Resources and Forest Biomaterials receive funding from four streams.

State	\$1.742 mm
ARS	.761 mm
Extension	.522 mm
McIntyre Stennis	.340 mm
(Federal Funding for Forestry Colleges)	

The reduction of each of these revenue streams will be different.

- **Chancellor's Task Force on Strategic Realignment.** Based on the metrics used, PSE and Wood Products meet targets. The graduate program's five year average triggered an under-performing rating. When 2005-2006 data is replaced with the current year data the situation improves dramatically.

In an effort to improve efficiency and effectiveness this report recommends review of the administrative functions of the science programs in CALS, PAMS and CNR. This review could result in a change in the relationship between Forest Biomaterials and the College of Natural Resources. The sciences in CALS, PAMS and CNR could be lumped together in a College of Sciences, PSE could be moved to the College of Engineering or PSE and the non-wovens department in the College of Textiles could merge.

At this point nobody knows what the future holds. The PSE faculty is discussing options. The Pulp and Paper Foundation Advisory Committee will be consulted for advice and counsel as alternatives become clear.

Rob Quarles pointed out that one of the PSE program strengths is that we have 100% job placement right out of college; and a good paying job at that.

Med Byrd pointed out that NCSU is one of only two PSE degree programs in the country. Gray Carter stated that NC State's PSE program is considered one of the elite programs in the nation with 100% job placement and a unique relationship with an industry that demands our students.

There was discussion about the changes that have taken place at Miami and at the University of Maine. Lou Boos and Jim Thompson felt that the changes at these institutions have been positive.

#### **PSE Recruiting Strategy, Scholarship Student Performance, COE Freshman Admissions Policy – Med Byrd**

Dr. Med Byrd reviewed the PSE recruiting strategy, the change in the College of Engineering freshman admissions policy and its potential impact of recruiting for PSE.

Of the 26 freshman who enrolled in September 2010, 9 have dropped out but 10 students have been recruited into the program from the College of Engineering resulting in a net gain of one.

Of the 59 scholarship offers made last year (49 to incoming freshman and 10 to on-campus/transfer students 26 accepted (44%).

Of the original 26 freshman scholarship students, one flunked out, one lost award due to grades, five left the program. Recruits from CHE and EU have done well. Recruits from PSU and CNR did not do as well. Recruiting students from E101 has been quite effective.

The College of Engineering is moving toward a non-program specific freshman admissions policy. This policy will be capacity driven instead of desire driven. After one year each engineering student will be given an index. Each Engineering Department will establish a criteria (cut-off). The net result may be positive for PSE recruiting. PSE will have an opportunity to see all engineering students not just EU students.

#### **Scholarships for 2011 – Katie McIntyre**

Katie McIntyre updated the group on the status of scholarship offers for 2011. Fifty scholarship offers have been made to incoming freshman and seven offers have been made to current students. The fifty offers to incoming freshman breakdown as follows:

- 29 in-state \$2,500 awards
- 18 one-time \$750 awards
- 2 out-of-state \$5,000 awards
- 1 full ride out-of state \$10,000 award

Seven current student \$2,500 award offers have been made.

It was agreed that efforts to establish Regional Mill Scholarships will continue. Three of the current offers (Hopewell/West Point VA Bennettsville SC and Riegelwood NC) could qualify. The goal would be to secure additional funding from the host mill and to name the award for the individual mill.

Katie discussed the new Paper Scholars Program. The goals of this program are to:

- Further develop community of scholars in PSE
- Enhance retention of underrepresented students
- Build on success of current programming

and to provide

- Professional development support
- Service to program and community
- Career exploration/development activities

Two important points were made during the discussion of recruiting.

The Paper International Experience and the International Joint Degree Program are big draws for incoming students.

Approximately \$20,000 is still needed to fund the Brazil Trip in May.

The success rate of providing internships and summer work experience is another big draw. At this point there are about 20 sophomores who do not have jobs for the summer.

HELP IS NEEDED IN THESE AREAS.

#### PPF Fund Raising Forecast – David Ashcraft

David Ashcraft presented the following Fund Raising Forecast

#### PPF Fund Raising Forecast

	2011-12	2012-13	Equilibrium
Annual gifts	\$151,250	\$135,000	\$135,000
Earnings	<u>125,000</u>	<u>170,000</u>	<u>225,000</u>
TOTAL INCOME	\$276,250	\$305,000	\$360,000
Less scholarships	269,000	262,534	300,000
Less salaries	<u>45,000</u>	<u>45,000</u>	<u>60,000</u>
TOTAL EXPENSES	\$314,000	\$307,534	\$360,000
Net	-\$37,750	-\$ 2,534	0

#### Projected Costs for Full Ride 2012-2013

##### Tuition and Fees

In-state costs	\$19,000
Out-of-state costs	\$34,000

#### Pulp and Paper Foundation Annual Meeting

– David Hickman

David Hickman told the group that the Annual Meeting is scheduled for October 12-14, 2011. Activities planned include:

#### 2011 Annual Pulp and Paper Foundation Meeting October 12-14, 2011

Industry Day	Wednesday, October 12
Golf and Banquet	Thursday, October 13
Annual Meeting and Program	Friday, October 14

Meeting adjourned by David Hickman.

Minutes recorded by: Ernie Alexander

## UPDATE ON THE PSE PROGRAM FOR 2010-2011

Dr. Med Byrd

Med Byrd

Katie McIntyre

The past year was quite challenging for the US and world economies. The paper industry however managed to do pretty well and this success was paralleled in the PSE program at NC State. With a good message and good industry support we continued to have strong enrollments, a high level of student success and outstanding job placements.

The 2010-2011 year started well with 26 new PSE freshmen. This significant enrollment number was due to combined efforts of the outgoing recruiter Carrie Hawes and the new recruiter Katie McIntyre. The program was quite fortunate to add Katie to our team. Katie came to us from Worcester Polytechnic Institute with experience and an impressive background in recruiting students into specialized technical programs. Katie's creativity and energy will be put to good use for both high school and on-campus recruiting.

There is continued good news with regard to our ability to attract students into PSE after they have been admitted to NC State in some other engineering discipline. As we reported last year the PSE Message (strong student support, scholarships, hands-on learning, high job placement) resonates well with a certain kind of engineering undergraduate. This message was disseminated in a variety of ways: on-campus flyers and posters; a strong presence at First Year College and other student career fairs; letters targeted to the large freshmen class in the Engineering Undesignated category; and Dr. Byrd's teaching of 250 students in the freshmen course E101 (Introduction to Engineering). As a result of these efforts 10 new freshmen were added to PSE. Even better, 12 additional students at the sophomore or junior level were also added. On-campus recruiting now plays a pivotal role in the program's success.

Despite this overall recruiting success one issue continued to be of concern – the lack of new freshmen from out of state. Only two of the 26 new freshmen for Fall 2010 were from other states (Virginia and Maryland). Part of the traditional strength of the PSE program has been its regionality; in typical past years 15-20 % of PSE students were from other states particularly those with a strong pulp and paper industry base. The causes for the downward trend are easily understood. Out-of-state tuition rates have risen steadily. Meanwhile the poor market performance of the Foundation investment fund (along with all others) meant that for two

years there was not enough funding for enhanced out-of-state scholarships (\$10,000 per year versus an in-state value of \$3,000 per year). There was simply no economic incentive for students from other states to come to NC State and study PSE.

This issue was of sufficient concern that the Foundation leadership at the direction of the Scholarship Committee developed a two-part strategy to rejuvenate out-of-state enrollment:

A new program was devised that assigned one normal undergraduate award (\$3000 per year) to key pulp and paper mills in surrounding states. The mills were asked to conduct some type of selection process for high school students in their area. It was hoped that the mills would add funds to the award as well as enhance its appeal by offering the award recipient a summer internship in the first year.

With annual giving receipts (individuals and companies) on the rise it was decided to reactivate the Paper Super Scholars program. In this program, active from 2007 through 2009, highly-qualified students from out of state competed for a full-ride scholarship (all college expenses paid). Finalists came to campus for interviews with faculty and alumni.

The success of the mill-targeted award program is still being evaluated. However, the revived Paper Super Scholars program was quite successful – five outstanding out-of-state candidates came to campus in February 2011 for the final interviews. One full-ride award recipient was selected (from Kentucky). However, what was noteworthy is that three of the remaining candidates who were offered normal (reduced) awards decided to come to PSE also. As a result of these efforts 5 out of 33 new freshmen for the Fall 2011 semester are from out of state. While this figure is still below the desired traditional level it represents an improvement.

Our freshmen recruiting efforts were again successful this past year and 33 new freshmen enrolled in PSE for the Fall 2011 semester. We are proud of the fact that some of our strategies to improve the diversity of our student body appear to be working – 36 % of the incoming class is female while 21 % of the class is from underrepresented groups.

Tiffany McLean

In October 2010 the College of Natural Resources (CNR) welcomed Tiffany McLean as the new Director of Enrollment Management. Mrs. McLean has a significant background in university admissions and recruiting, she most recently served as Assistant Director of Admissions at Georgia Institute of Technology. Her enthusiasm is unmatched and with her guidance the CNR recruitment team has worked hard to strategically grow and improve its activities.

One of the biggest accomplishments for the past year was our engineering re-accreditation. In the fall of 2010 a team of evaluators from the accrediting agency ABET visited the NC State campus to inspect and review all 17 engineer-

ing programs on campus. The PSE program along with all of the other programs was fully accredited through September of 2017. PSE received a number of favorable comments.

It was a good year for international opportunities for PSE students. The first group of NC State PSE students participated in the Transatlantic Paper Science program (TAPS), which awards students an attractive scholarship to study paper science courses abroad during their junior year. Upon completion of their senior year back home the students will receive degrees from both NC State and from a university in the EU. Seven PSE students spent the Fall 2010 semester split between two Finnish institutions – Tampere University of Applied Sciences and Jyväskylä University of Applied Sciences. The students then came back together to study in Germany at the Munich University of Applied Sciences for the Spring 2011 semester. Between terms most of the students were able to obtain internships at manufacturing or converting operations in Europe. In their debriefing interviews with Dr. Byrd upon their return these students have confirmed that this was a life-changing experience! For the upcoming year two more PSE students have embarked on the TAPS program.

Of course the TAPS program is a true exchange and last year five students from the EU (three from Finland two from Germany) came to study at NC State for the year. These students studied both PSE courses and general education courses (history literature etc.). The differences in teaching styles and culture were, according to the participants, quite striking (a sentiment echoed by their US counterparts). All of the participants ranked the experience as one that they would never forget. For the current year four more Finnish students are studying at NC State.

May 2011 saw the third iteration of the Paper International Experience (PIE), a biennial program that allows juniors and seniors in PSE to visit pulp and paper facilities in other countries. This year Dr. Byrd and Katie McIntyre accompanied 15 PSE juniors and seniors on a 10-day excursion to Brazil where they visited four amazing manufacturing sites (including the largest pulp mill in the world) and the university at Vicosa. Generous donations from companies, alumni, individuals and past PIE participants permitted these students to participate for a fraction of the total cost such experiences will enhance the global awareness of the students and help them understand the global nature of the pulp and paper industry.

Industry recruiting for the year was vigorous with primary manufacturers and suppliers lining up to hire PSE graduates. Permanent job placement was (again) 100 % for students graduating in December and May. Of the 23 students graduating for the year:

- 15 accepted positions with paper manufacturers or suppliers
- 3 accepted positions in other industries
- 5 were accepted into graduate school

The first annual Paper Industry Career Fair was held in conjunction with the fall Foundation meeting and it was a big success. Seven companies participated and were given premium face-to-face time with students in PSE, chemical engineering, mechanical engineering and electrical engineering. This event will be repeated this fall and it looks to be at least twice as large.

Semester co-op positions were abundant (70 % of PSE students do at least one co-op rotation). However, summer internship offerings for 2011 were down significantly. This is not unusual for a difficult economic time. However, we want to urge our industry partners to maintain and grow their summer internship programs – internships are vital for student professional development, especially for rising sophomores and juniors.

Our thanks to the alumni, friends and supporters who help us achieve our mission. We will need more support than ever to meet the challenges of the future. With our continued partnership we will succeed!

*Dr. Ernie Alexander earns recognition as CNR Alumnus of the year. Patti Woodbury & Jennifer Catalano*

*Dr. Dimitris S. Argyropoulos*

*Dr. Medwick V. Byrd*

*Dr. Hou-Min Chang*

*Dr. Vincent Chiang*

*Dr. Sudipta Dasmohapatra*

*Dr. Joe Denig*

*Dr. John A. Heitmann Jr.*

*Dr. Martin A. Hubbe*

*Dr. Hasan Jameel*

*Dr. Steven Kelley*

*Dr. Adrianna Grant Kirkman*

*Dr. Michael J. Kocurek*

**Dr. Dimitris S. Argyropoulos**

Finland Distinguished Professor Ph.D. McGill University Montreal  
His research interests are centered around the Organic Chemistry of Wood Components with emphasis of the development of new Forest-based Advanced Materials. Current research in his group includes the development of novel processing platforms (ionic liquids), oxidation chemistry and catalysts for the synthesis of bio-based monomers polymers and solvents.

**Dr. Medwick V. Byrd** Teaching Assistant Professor  
Ph.D. North Carolina State University

His research interests are mechanical pulping, chemical pulping and bleaching and non-wood pulping. Other areas of his research and technical services are agricultural fibers and biomass.

**Dr. Hou-Min Chang**

Reuben B. Robertson Professor Emeritus Ph.D. University of Washington  
His research interests are in the chemistry of lignin, chemical processing of wood, chemistry of pulping and bleaching processes pollution abatement in pulp and paper mills and chemical and morphological characterization of wood as related to tree breeding and transgenic trees.

**Dr. Vincent Chiang**

Jordan Family Distinguished Professor for Natural Resources Innovation  
Co-Director Forest Biotechnology Group  
Ph.D. University of Washington  
His research interests are chemistry, biochemistry and molecular biology of lignin biosynthesis with a focus on systems approach; cellulose and hemicellulose biosynthesis; functional genomics and genomic reconstruction for wood formation.

**Dr. Sudipta Dasmohapatra**

Assistant Professor Ph.D. The Pennsylvania State University  
Her research interest is in the area of forest products business including strategic management, marketing, supply chain management, perceived value and emerging markets.

**Dr. Joe Denig**

Professor and Departmental Extension Leader  
Ph.D. Virginia Polytechnic Institute and State University  
He provides educational programs and technical assistance to the primary manufacturing wood products industry in North Carolina with emphasis on sawmills. Major program areas include log breakdown and lumber optimization quality control thin kerf sawing equipment and mill layout and lumber drying.

**Dr. John A. Heitmann Jr.**

Professor Ph.D. Institute of Paper Chemistry  
He is a specialist in papermaking science. His research interests are recycled fibers biotechnological applications to papermaking processes wet end chemistry and other aspects of papermaking.

**Dr. Martin A. Hubbe**

Buckman Professor Ph.D. Clarkson University  
His research focus areas include electrokinetics, dry-strength development and effects of polyelectrolytes on the papermaking process.

**Dr. Hasan Jameel**

Elis and Signe Olsson Professor Ph.D. Princeton University  
His research interests are pulping and bleaching processes, process modeling and simulation and black liquor gasification.

**Dr. Steven Kelley**

Department Head, Ph.D. Virginia Tech  
His research work is focused on the development and characterization of bioenergy and biomaterials. In the bioenergy arena he works with colleagues to develop improved analytical tools and processes for the production of liquid fuels and other products. In the biomaterials arena he has focused on the development and characterization of polymer blends and crosslinked materials that are useful for membranes and composites.

**Dr. Adrianna Grant Kirkman**

Professor and Associate Dean Ph.D. North Carolina State University  
Her research interests are process analysis mathematical modeling and simulation.

**Dr. Michael J. Kocurek**

Professor Emeritus Ph.D. College of Forestry at Syracuse University  
Dr. Kocurek is a recognized educator in pulp and paper. His area of expertise are Paper Properties and Pulp and Paper Technology.

**Dr. Richard L. Lemaster**

Research Professor  
Director of the Wood Machining & Tooling Research Program  
Ph.D. North Carolina State University  
He is an expert in the fields of wood machining, process monitoring, surface finish evaluation as well as non-destructive evaluation (NDE). His research interests also include applying his NDE experience to wood frame housing.

*Dr. Richard L. Lemaster*

*Dr. Lucian A. Lucia*

*Dr. Philip H. Mitchell*

*Dr. Sunkyu Park*

*Dr. Joel Pawlak*

*Dr. Perry Peralta*

*Dr. Ilona Peszlen*

*Dr. Richard Phillips*

*Dr. Orlando J. Rojas*

*Dr. Daniel E. Saloni*

*Dr. David C. Tilotta*

*Dr. Richard A. Venditti*

#### **Dr. Lucian A. Lucia**

Associate Professor Ph.D. University of Florida

Research in The Laboratory of Soft Materials & Green Chemistry includes developing renewable and bio-compatible scaffolds for tissue engineering, generating bio-composites, synthesizing renewable materials based on lignin and polysaccharides and enhancing the use of wood and North Carolina pocomsin biomass for bioenergy via novel pretreatment technologies.

#### **Dr. Philip H. Mitchell**

Associate Professor Ph.D. Virginia Polytechnic Institute and State University

He provides educational programs and technical assistance to the value-added manufacturing wood products industry in North Carolina with emphasis on the furniture and cabinet industries. Major program areas include lumber cut-up optimization CNC routing, wood bonding, wood-moisture relations and small scale mass customization.

#### **Dr. Sunkyu Park**

Assistant Professor Ph.D. North Carolina State University

His research focuses on the bioenergy production from ligno-cellulosic materials. Current research interests include the investigation of biomass recalcitrance affecting enzymatic action, efficiency development of novel pretreatment process and process simulation of bioenergy production.

#### **Dr. Joel Pawlak**

Associate Professor Ph.D. College of Environmental Science and Forestry at Syracuse University

His research interests include new materials from natural polymers micro-cellular foams organic/inorganic composites 100 % natural composites and the physical behavior of paper. He teaches classes in the areas of paper physics, forest biomaterials physics and product design.

#### **Dr. Perry Peralta**

Associate Professor Ph.D. Virginia Polytechnic Institute and State University

His research interest is in the area of wood physics including transport phenomena in wood and wood composites wood-moisture relations and lumber drying. His current research projects include the evaluation of the visco-elastic properties of genetically engineered wood and the application of non-woven technology to wood composites, manufacture.

#### **Dr. Ilona Peszlen**

Associate Professor Ph.D. Virginia Polytechnic Institute and State University

Her research emphasis is in juvenile and reaction wood environmental effects on and genetic improvement of wood, quality and the properties and utilization of plantation wood.

#### **Dr. Richard Phillips**

Executive in Residence Ph.D. North Carolina State University

His research is focused on the technical and economic evaluation of biomass conversion processes.

#### **Dr. Orlando J. Rojas**

Associate Professor Ph.D. Auburn University

His research focuses on colloid and surface science and the adsorption behaviors of surfactants and (bio)polymers at solid/liquid interfaces. His group currently works on the dynamics of enzymatic degradation; biosensor development; friction and adhesion in polymeric interfaces; adsorption dynamics and the separation derivatization and use of natural polymers and surfactants.

#### **Dr. Daniel E. Saloni**

Assistant Professor Ph.D. North Carolina State University

His areas of interest include analysis of lean green implementation in residential green building and materials biomass residues conversion into fuels lean manufacturing and process improvement housing and energy analysis, as well as others.

#### **Dr. David C. Tilotta**

Associate Professor Ph.D. Kansas State University

His research interests include the chemical contamination and decontamination of wood and the development of analytical methodology for the detection of organic and inorganic components in wood.

#### **Dr. Richard A. Venditti**

Associate Professor

Director of Graduate Programs, Ph.D. Princeton University

Research interests include (1) novel processing and applications for cellulose lignin and other forest biomaterials, (2) lignocellulosic feedstocks to produce biofuels (3) efficient paper recycling processes and (4) life cycle analysis.
