2012 ANNUAL REPORT COVER

The cover photo features the graduating class of 1964 and Dr. Rojas' Fall 2012 Paper Properties class (PSE 212).

**“PART OF OUR GLORIOUS TRADITION IS THAT WE HAVE
BEEN TRANSFORMING ALL ALONG!”**

- Jennifer Piercy

**GREETINGS FROM RONNIE HISE TO
ALUMNI,
MEMBER-COMPANY REPRESENTATIVES,
FACULTY,
ADMINISTRATORS,
STAFF, AND STUDENTS!**

Can it be that a full year has gone by since I agreed to serve in this leadership role for the Foundation? I can recall the immediate feelings of inadequacy when I was asked to consider it. So much tradition, so many large shoes to fill over the history of this great organization! Thanks to all the folks who provided good advice and great help during this first year of my three year term!

Founded in 1954 (before I was born), the Foundation has done many, many good things, on behalf of this program and for the students and graduates, over the past 58 years. The mission of the Foundation has always been to help recruit the brightest and best high school students into the program, with the intent that many, if not most, would then work in this industry when they graduate. This is done primarily by raising money for scholarships, part of which comes from corporate members' dues, part from individual annual gifts, and part from Foundation endowments. Member companies also provide intern and co-op opportunities in mill operations and with vendor organizations, to help students get a better feel for the "real world."

Is this an antiquated model? Are we kidding ourselves that, in this global high-tech economy, young people will really want to work in a "bricks and mortar" industrial sector? Aren't they going to be more interested in doing something related to "environmental sustainability," focused on producing goods and services that consumers want and need, making a great salary? Wait a minute – I think I just described the paper industry, and the companies that provide goods and services to that industry: high-tech, global, environmentally sustainable, focused on meeting the needs of consumers, and among the highest paid graduates every year!

Introspection – a healthy exercise

We have an abundance of tradition, as noted above, and we

are living in a transforming world. A healthy exercise for any organization is to challenge our mission and vision as a Foundation. Is our mission still viable and worthwhile? Are we doing the best we can with the resources we have been given? Where will this organization be in 10 or 20 years? We have convened an ad hoc committee to study and debate these and related questions and bring back recommendations to the Advisory Board. That effort should be completed in time for our Spring 2013 Foundation Meeting.

Lots of things have changed for our industry since the Foundation came on the scene. There are fewer and larger companies due to mergers and acquisitions, many companies have global operations; MANY more regulations and laws exist now with which we must comply, global competition has dramatically increased, energy costs are higher, much more automation exists, and there are many new computer-based applications and tools available. Many things HAVEN'T changed: our industry's primary raw material (wood) is still a renewable natural resource, mills are still located primarily in rural areas, mill operations still require coordination across many departments with (literally) lots of "moving parts" and heavy equipment, operating economically and efficiently still requires sound engineering knowledge and thought-processes; and driving innovation is as important today as it has ever been. Is the Foundation still focused on "the right things" and using all the right tools? That's what we will be challenging and discussing.

What are we focused on achieving for the coming year?

Along with an introspective look at our mission and vision for the future, the Foundation is focusing on three tactical areas: (1) (re-)engagement of alumni and corporations, (2) making sure we're addressing the future needs of the industry and the students coming through this program, and (3) the structure of the Foundation (governance, committees, etc.).

Re-engaging with Alumni and Corporations

We are very pleased and excited to welcome Jennifer Piercy (Class of 1994) as our new Executive Director of the Foundation! While her duties will include all three areas, a primary emphasis will be on re-engaging with our roughly 1500 alumni and encouraging them to “get involved.” Similarly, we will be reaching out to existing companies to renew their commitments and recruiting new companies to join the Foundation. There are many companies, especially equipment vendors and suppliers, who benefit greatly from hiring our graduates but aren’t members. We’re working on developing a marketing strategy that succinctly defines and explains the “value proposition” for the PSE program and our Foundation.

Addressing the Future Needs of the Industry and the Students

Does the existing program adequately address the changes affecting our industry that were mentioned earlier? Are we equipping these graduates to be competitive in the jobs marketplace, not just with “book skills” but with leadership skills and good work ethics? Our numbers would suggest that we do. Can we do better? Of course! The Foundation has traditionally played an important role in bringing to faculty and administrators suggestions for introducing new topics and courses to the curriculum and by providing perspective on global trends. The Foundation has also helped identify opportunities for summer, fall and spring co-op and intern positions where students develop leadership skills and really learn what roles they might play when they graduate. Over the next year or two, we will be assessing how we can do an even better job and further strengthen the ties between the university and the industry to make sure we are turning out the best qualified candidates for jobs.

Structure of the Foundation

The Pulp and Paper Foundation is still adjusting to a major shift that occurred three years ago when the NC State Natural Resources Foundation, Inc. was formed. The main difference is that we are no longer actively managing an endowment. This allows us to focus exclusively on executing our primary mission of recruiting high school students via our scholarship program and providing industry feedback regarding the curriculum. Do we have the right structure in place? Are all the right committees in place and working on the “right things?” Is our meeting structure and timing still appropriate? We will be testing and discussing these and other issues in the coming year.

We encourage you to come alongside us, help us answer these questions and guide our transformation in the coming years. As always, thank you for your support and contributions to our outstanding program and foundation!

Best wishes for a profitable and rewarding year!

Ronnie Hise, Ph.D.
President
NC State Pulp & Paper Foundation

* Deceased

DR. MARY WATZIN BECOMES THE NEW DEAN OF THE COLLEGE OF NATURAL RESOURCES

“There were many things that went into my decision to take this position, but one of the most important was the people. I saw a community, in the fullest sense of that word. I look forward to getting to know each and every one of you.”

- Dr. Watzin

North Carolina State University Provost Warwick Arden announced in late June that Dr. Mary Catherine Watzin had been named dean of the College of Natural Resources. Watzin succeeds retiring dean, Dr. Robert Brown.

“I’m very pleased that Dr. Watzin will be joining us to lead the College of Natural Resources,” Arden says. “She has demonstrated significant administrative leadership skills and experience, and brings a broad perspective on natural resources and the environment that will serve this highly regarded college extremely well moving forward.”

Watzin, who is currently the dean of the Rubenstein School of Environment and Natural Resources at the University of Vermont will step into her new role on October 15, 2012. “I am deeply honored by the opportunity to lead NC State’s nationally prominent College of Natural Resources,” she said. “The college and the university have a bold vision for the future and I am inspired by the transformational change that is under way across the campus. Solutions to the challenges of today’s world will come through new collaborations and the kinds of interdisciplinary teaching, research and global engagement that NC State is pursuing. I am very excited to join this effort.”

An expert in marine sciences, aquatic ecology and management, Watzin has served as dean of the Rubenstein School since 2009 and as professor since 2005. Before becoming dean, she founded and directed the University of Vermont’s lakefront ecosystem science laboratory, which also oversees the university’s research vessel and collaborates closely with an adjacent science center and aquarium.

A prolific scholar and noted speaker, Watzin has authored and co-authored more than 60 refereed journal articles and book chapters and more than 45 refereed technical reports and other publications. For the last decade she has presented local talks on research and environmental topics of interest to her community.

Watzin received her bachelor’s degree in marine science from the University of South Carolina in 1978 and her Ph.D. in marine sciences from the University of North Carolina at Chapel Hill in 1984. After receiving her Ph.D., she worked as an ecologist for the National Wetlands Research Center, part of the U.S. Fish and Wildlife Service, in Slidell, La.

“We look forward to welcoming Dr. Watzin back to North Carolina and assisting her transition in any way we can,” said Pulp & Paper Foundation President Ronnie Hise. “Our foundation and its membership have always maintained a positive relationship with the PSE Program, the College of Natural Resources and the University. We expect that to continue under Dr. Watzin’s leadership and are honored that she recognizes the sense of community and relationship we all strive to achieve.”

The future looks very bright for the Paper Science and Engineering Program at NC State. We look forward to partnering with Dean Watzin in her efforts to leverage the traditional strengths of the college and to position CNR as the nation’s most comprehensive and impressive natural resources college.

MS. JENNIFER PIERCY NAMED NEW EXECUTIVE DIRECTOR OF THE PULP & PAPER FOUNDATION

“It’s hard to believe that almost 25 years ago I was pondering the endless opportunities for my college education. I must have had over 15 applications in the works when I met John Pritchard (NCSU ’68) at a local recruiting event in Western, KY. I was so energized and excited about the Pulp & Paper program, the dual degree option, and the scholarship opportunities that I accepted admission to NC State before I ever stepped foot in the state of North Carolina! Having just met the incoming freshman class, I can heartily say that this type of excitement is ever-present and on a much grander scale! Our tradition is one almost 60 years strong and growing!”

- Jennifer Piercy

As the new Pulp and Paper Foundation Executive Director, I can’t even begin to put into words what a privilege and honor it is to accept this role. I am a PPT/CHE dual degree holder from the class of 1994. My experiences include 8 years in the paper industry; 5 years in higher education; and 5 years as a small business owner. I have worked with high school students, undergraduate and graduate students, alumni, corporate recruiters and industry members during this time. Not only am I excited to see all these skill sets come together in what I have deemed as “the perfect role” for me; but it is for the Pulp & Paper Program and NC State! These are both things that are near and dear to my heart. I feel an immense sense of pride in this role. I am committed to continue our strong tradition while at the same time transforming us to reach new horizons.

You will hear the university (and our foundation) talk a lot about the 125th anniversary theme of “Tradition and Transformation”. Our program has deeply rooted traditions and some things never change. I loved seeing many of the same faculty members who spent countless hours teaching and mentoring me; the same building; the same “baby” paper machine; the same smell (which we industry folks don’t mind a bit). The transformation is also very apparent with additional faculty ready to share and mentor; upgraded labs and classrooms; a new student lounge; more technology and students who will knock your socks off! Part of our glorious tradition is that we have been transforming all along!

In the coming months, I will be working with the Foundation board, members and committees to define our short and long term goals. We will focus our efforts to meet these goals. After a trend of spending cutbacks for almost 4 years, we’re beginning to spend money as annual giving increases. We have already begun increasing scholarship funds with a goal of adding \$100,000 in 4 years to these funds. We will challenge our alumni to become more involved and partner with us in new ways to provide more support for our students than ever before! We will recruit and retain high achieving students inside and outside of North Carolina to produce the best product available anywhere in our marketplace! Our foundation will become one of significant contribution to the program, the students and industry and companies it serves!

Our industry is essential to our society. Natural resources are sustainable and renewable. On these principles NC State and the Pulp & Paper Foundation have built a rock solid tradition. It is on these very same principles that we will remain focused as we transition into a new and exciting era. I am beyond honored to serve in this capacity. I can’t wait to get out and meet our fabulous alumni, friends and industry supporters. I will leave you with a recent quote I made to some foundation and faculty members: “I feel a tremendous obligation (in a healthy way) to take the Foundation and Program in the positive direction that it deserves; worthy of all the hard work that industry leaders, staff and faculty have put into it over the years!”

“I LOOK FORWARD TO MEETING AND RECONNECTING WITH EVERYONE SOON!”

This was another year full of challenges...and successes. Continued budget cuts and the unprecedented loss of some support positions stretched departmental resources thin. The loss of recruiter Katie McIntyre, and the time it took to replace her, added to the concerns about recruiting for the upcoming year.

And yet, even with these considerable challenges, the key results for the year were overwhelmingly positive: A) 26 graduates, most with multiple job offers – 100% placement; B) a large incoming freshman class, with 33 students. These numbers maintain NC State's position as the largest US program awarding a specific degree in Paper Science & Engineering.

Permanent job offers were abundant, with many students receiving up to 6 offers from manufacturers and suppliers. Of the 26 graduates, 20 (77%) accepted offers in the paper and allied industries, while 6 accepted offers in other industries.

Co-op positions continued to be plentiful, with more positions open than there were students to fill them. More and more students are doing at least one co-op rotation, with an increasing number doing so in the sophomore year. Summer internships, while still not available at the pre-recession level, were much improved. Most upperclassmen seeking an internship were able to obtain one, and 8 out of the 33 incoming freshmen were placed into internships.

The success in freshman recruiting was due in part to the early work done by Katie, and, we suspect, to the pervasive message that the PSE degree carries with it the promise of a job. In fact, when some freshmen were asked why they applied to PSE, they said “because we heard that you can get a job.” In a tough economic climate, that message resonates!

The diversity of the freshman class was impressive – 36% female and 21% under-represented populations. Even more impressive was the fact that most of these students were retained after the first year. We continue to focus on improving the diversity of our student body.

On-campus recruiting continues to add to the PSE undergraduate enrollment figures. Ten additional students from other programs on campus joined PSE in the spring semester.

The Foundation has expressed an interest in restoring the proportion of out-of-state students in the program to the levels of years past (approximately 20%). To this end, the “Paper Super Scholars” scholarship program again proved to be a valuable tool. Approximately 80 applications were received for this full-ride scholarship, from students in a variety of states. Overall, the qualifications of these applicants were amazing. The Scholarship Committee selected nine finalists to attend

2011-2012 Year in Summary

Number of Graduates: 26

Job Placement: 100%

Average Salary: \$65,000

Incoming Freshman (Fall 2011): 33

Transfer Students Added: 10

an on-campus interview event. Six students accepted. From that group, one student – Steven Gillespie of Chester, VA – was selected to receive the full ride. The other finalists were offered awards ranging from \$2500 to \$5000 per year. Five of the six offers were accepted. When combined with other out-of-state admissions, the incoming freshmen class for the fall of 2012 will have 18% of its students from outside of NC.

Recruiting for the upcoming year (2012-2013) has yielded one of the largest incoming classes in recent years – 34 new PSE students!

The ground-breaking Transatlantic Paper Science (TAPS) degree program reached an important benchmark in 2012 with the awarding of an NC State paper science and engineering degree to two students from the EU that studied with us in 2010-2011. The students also received a degree from their home institutions. It is expected that five NC State PSE students will likewise receive a second degree from the EU when they finish their studies in May 2013. Two more PSE students are currently studying abroad in the TAPS program, and five more will go out this fall. This amazing program is helping to increase the global knowledge of our students.

The departure of recruiter Katie McIntyre presented a challenge. After significant internal discussions, it was decided to change the position from one primarily dedicated to recruiting to one that also focuses on industry contacts/outreach, program publicity, and alumni relations. When we posted the position opening for this “Director of Program Enhancement,” we were amazed to get applications from five program alumni. The position has now been filled by Jennifer Piercy (PPT/CHE 1994), and we hope that all of you will get to meet her in the upcoming months.

We were sad to say goodbye to senior lab technician Linda McMurray (early retirement), who had provided strong teaching lab support for over 20 years. But we are glad to welcome her replacement, Beverly Miller. Beverly has extensive laboratory experience in the pulp and paper industry, most recently with MeadWestvaco at the research center in Raleigh.

Our thanks to the alumni, friends, and supporters who help us achieve our mission. We will continue to provide a strong focus on the core pulp and paper industry, while keeping an eye on innovation and new products that will sustain us in the future.

“Due to the accreditation of the program and numerous internship opportunities, I was able to do a co-op with Packaging Corporation of America in Valdosta, GA after my freshman year. I am working in the Pulp and Paper Laboratories as a Service Technician, learning about a variety of testing methods and effects of cooking variables on different substances. I gained a great amount of experience that will benefit my professional career after graduation.”

- Patrick Leasure

12 FACULTY PROFILES

Dr. Dimitris S. Argyropoulos

Professor, Finland Distinguished Professor

Ph.D. McGill University Montreal

His research interests are centered around the organic chemistry of wood components with emphasis on the development on new Forest-based Advanced Materials. Current research in his group includes the development of novel processing platforms (ionic liquids), oxidation chemistry, and catalysts for the synthesis of bio-based monomers, polymers, and solvents. He teaches Wood Chemistry.

Dr. Medwick V. Byrd

Teaching Associate Professor

Ph.D. North Carolina State University

His research interests are mechanical pulping, chemical pulping and bleaching, and non-wood pulping. Other areas of his research and technical services are agricultural fibers and biomass. He teaches Pulping and Papermaking Technology, the Project design and Analysis, and an almost infinite number of E101 sections.

Dr. Hou-Min Chang

Reuben B. Robertson Professor Emeritus

Ph.D. University of Washington

His research interests are in the chemistry of lignin, chemical processing of wood, chemistry of pulping and bleaching processes, production of energy products from biomass, and chemical and morphological characterization of wood as related to tree breeding and transgenic trees.

Dr. Vincent Chiang

Jordan Family Distinguished Professor for Natural Resources Innovation; Co-Director, Forest Biotechnology Group; Ph.D. University of Washington

His research interests are chemistry, biochemistry, and molecular biology of lignin biosynthesis with a focus on systems approach; cellulose and hemicellulose biosynthesis; functional genomics and genomic reconstruction for wood formation.

Dr. Sudipta Dasmohapatra

Assistant Professor

Ph.D. The Pennsylvania State University

Her research interest is in the area of forest products business and analytics, including strategic management, marketing, supply chain management, perceived value, and emerging markets.

Dr. Joe Denig

Professor and Departmental Extension Leader

Ph.D. Virginia Polytechnic Institute and State University

He provides educational programs and technical assistance to the primary manufacturing wood products industry in North Carolina with emphasis on sawmills. Major program areas include log breakdown and lumber optimization, quality control, thin kerf sawing, equipment and mill layout, and lumber drying.

Dr. Ronalds Gonzalez

Assistant Professor

Ph.D. North Carolina State University

Dr. Gonzalez uses his skills in supply chain, conversion simulation & economics, and business models to identify the most profitable way to convert a given feedstock into a desired product. Products of interest include pulp and paper, wood and energy products, with a focus on opportunities for integration between these different conversion processes. His analyses allow identifying opportunities, risks and tradeoffs.

Dr. John A. Heitmann, Jr.

Professor

Ph.D. Institute of Paper Chemistry

He is a specialist in papermaking science. His research interests are recycled fibers, biotechnological applications to papermaking processes, wet end chemistry, and other aspects of papermaking. He teaches Paper Process Analysis, and Pulp and Paper Unit Processes I.

Dr. Martin A. Hubbe

Buckman Professor

Ph.D. Clarkson University

His research is based on the fundamentals of physical chemistry and biomass surfaces, and applied to electrokinetics, dry-strength development, and effects of polyelectrolytes on the papermaking process. He teaches Wet-end/Polymer Chemistry.

Dr. Hasan Jameel

Elis and Signe Olsson Professor

Ph.D. Princeton University

His research interests are pulping and bleaching processes, process modeling and simulation, biofuels production and integration, and black liquor gasification. He teaches Pulping Process Analysis and Pulp and Paper Unit Processes II

Dr. Stephen S. Kelley

Professor and Department Head

Ph.D. Virginia Polytechnic Institute and State University

His research work is focused on the development and characterization of bioenergy, and biomaterials. In the bioenergy arena he works to develop improved analytical tools and processes for the production of liquid fuels and other products. In the biomaterials arena he develops polymer blends and cross-linked materials that are useful for membranes and composites.

Dr. Adrianna Grant Kirkman

Professor and Associate Dean

Ph.D. North Carolina State University

Her research interests are process analysis, mathematical modeling and simulation. She teaches Process Design and Analysis Laboratory.

Dr. Michael J. Kocurek*Professor Emeritus**Ph.D. College of Forestry at Syracuse University*

Dr. Kocurek is a TAPPI Fellow. His areas of expertise are Paper Properties, and Pulp and Paper Technology.

Dr. Richard L. Lemaster*Research Professor - Director of the Wood Machining & Tooling Research Program - Ph.D. North Carolina State University*

He is an expert in the fields of wood machining, process monitoring, surface finish evaluation, as well as non-destructive evaluation (NDE). He research interests also include applying his NDE experience to wood frame housing.

Dr. Lucian A. Lucia*Associate Professor**Ph.D. University of Florida*

His research is focused on developing renewable and bio-compatible scaffolds for tissue engineering, generating bio-composites, synthesizing renewable materials based on lignin and polysaccharides, and enhancing the use of wood. He teaches Green Chemistry.

Dr. Philip H. Mitchell*Associate Professor**Ph.D. Virginia Polytechnic Institute and State University*

He provides educational programs and technical assistance to the value-added manufacturing wood products industry in North Carolina with emphasis on the furniture and cabinet industries.

Dr. Sunkyu Park*Assistant Professor**Ph.D. North Carolina State University*

His research focuses on the bioenergy production from ligno-cellulosic materials. Current research interests include the investigation of biomass recalcitrance affecting enzymatic action efficiency, development of novel pretreatment process, and process simulation of bioenergy production. He teaches Bioenergy and Biomaterials Engineering.

Dr. Joel Pawlak*Associate Professor and Interim Associate Dean**Ph.D. College of Environmental Science and Forestry at Syracuse University*

His research interests include new materials from natural polymers, micro-cellular foams, organic/inorganic composites, 100% natural composites, and the physical behavior of paper. He teaches classes in the areas of paper physics, forest biomaterials physics, and product design. He teaches Paper Properties, and Paper Physics and Product Design.

Dr. Perry Peralta*Associate Professor**Ph.D. Virginia Polytechnic Institute and State University*

His research interest is in the area of wood physics, including transport phenomena in wood and wood composites, wood-moisture relations, and lumber drying. His current research

projects include the evaluation of the visco-elastic properties of genetically engineered wood.

Dr. Ilona Peszlen*Associate Professor - Director of Graduate Programs**Ph.D. Virginia Polytechnic Institute and State University*

Her research emphasis is in juvenile and reaction wood, environmental effects on and genetic improvement of wood quality, and the properties and utilization of plantation wood.

Dr. Richard Phillips*Executive in Residence**Ph.D. North Carolina State University*

His research is focused on the technical and economic evaluation of biomass conversion processes. He teaches Paper Industry Strategies and Project Analysis.

Dr. Orlando J. Rojas*Associate Professor, Finland Distinguish Professor, Aalto University**PhD. Auburn University*

His research focuses on colloid and surface science and the adsorption behaviors of surfactants and biopolymers at solid/liquid interfaces. His group currently works on the dynamics of enzymatic degradation; biosensor development; friction and adhesion in polymeric interfaces; adsorption dynamics and, the separation, derivatization and use of natural polymers and surfactants. He teaches Paper Properties.

Dr. Daniel E. Saloni*Assistant Professor**Ph.D. North Carolina State University*

He has specialized in the area of supply chain, manufacturing and process improvement for the forest products industry, including biomass supply chain, techno-economic analysis on energy densification and torrefied materials, and life cycle analysis.

Dr. David C. Tilotta*Professor**Ph.D. Kansas State University*

His research interests include the chemical contamination and decontamination of wood and the development of analytical methodology for the detection of organic and inorganic components in wood.

Dr. Richard A. Venditti*Professor**Ph.D. Princeton University*

Research interests include novel processing and applications for cellulose, lignin and other forest biomaterials; lignocellulosic feedstocks to produce biofuels; efficient paper recycling processes and life cycle analysis. He teaches Process Control and Life Cycle Analysis.

NC STATE'S PAPER SCIENCE & ENGINEERING PROGRAM NOW HAS SIX TAPPI FELLOWS

"I am honored to receive this prestigious award and would like to thank TAPPI for its recognition of outstanding faculty and industry contributors at NC State and beyond."

- Dr. Richard Venditti

Each year, the Association elects members as TAPPI Fellows in recognition of meritorious service to the Association and the industry. In 2012, Dr. Richard A. Venditti was elected as a TAPPI Fellow, joining TAPPI Fellows and NC State faculty Drs. Hou-min Chang, Martin A. Hubbe, Hasan Jameel, Michael J. Kocurek, and Richard B. Phillips.

Dr. Richard A. Venditti

Dr. Venditti's election was based, in part, on his contributions to automatic sorting of wastepaper through the development of a lignin sensor that is now utilized in the most modern automated paper sorting equipment (MSS Sorting Equipment). Additionally, his work on recycled paper and 'stickies' behavior has been instrumental in understanding the detection/removal/separation of stickies. Venditti was an important contributor to the multiinstitutional stickies detection round robin testing. He has directed, lectured and taught labs in the highly ranked TAPPI/NCSU Hands On Workshop for Pulp and Paper Basics, which has taught more than 700 industry professionals since 1996. The course brings much needed hands-on training to the paper industry workforce. Both his teaching of NCSU and industry short course students has helped provide better trained, highly motivated and loyal employees to the industry.

In 2001, he was awarded The Investigator of the Year Award by the AF&PA Containerboard Group Technical Division for his research in paper recycling. In 2009, he received a Fulbright Senior Specialist in Environmental Science for travel to South Africa and in 2010, was awarded the Association for the Concerns of African American Graduate Students Advocacy Award at NCSU.

In addition, the program has five other TAPPI Fellows who have all made far-reaching, high impact contributions to technology and education for the pulp and paper industry.

Dr. Michael J. Kocurek

In 1985, Dr. Michael Kocurek, Professor Emeritus, was elected for his contributions to TAPPI, and as an academic leader and research manager. Dr. Kocurek has taught over 3,000 industry operators and professionals at over 50 paper industry corporations, government and other organizations; in addition to his teaching of undergraduate and graduate students since 1970. Mike has taught TAPPI's oldest and most highly ranked short course, "Introduction to Pulp & Paper" for over 34 years.

Prior to joining NC State, he served as Paper Science Department Head at the University of Wisconsin-Stevens Point, an academic program he founded. He also served as Executive Director of the Herty Foundation, where he oversaw a \$27 million modernization of the laboratory, creating the largest pilot scale P&P and advanced fiber development center in the US.

In addition to being a TAPPI Fellow he has been honored with the TAPPI Distinguished Service Award, and induction into the Paper Industry International Hall of Fame – an honor bestowed on individuals who have made preeminent contributions to the global paper industry.

Dr. Hou-min Chang

In 1999, Dr. Hou-min Chang, Professor Emeritus, was elected as a TAPPI Fellow for his contributions as a researcher and educator in the areas of pulping and bleaching chemistry,

lignin biodegradation chemistry and the biological treatment of lignin-derived wastewaters. His studies in the chemistry of pulping and bleaching have included oxygen delignification and bleaching reactions, characterization of residual lignin, anthraquinone pulping, extended delignification, and chlorine-free bleaching processes. He has been a pioneer in investigating “oxidative extraction” to improve bleaching efficiency. He continues to serve the Paper Science and Engineering Program by training and supervising graduate students and research projects, and contributing his tremendous chemical insights to a wide variety of pulp and paper, and bioenergy research projects.

In addition Dr. Chang was honored by North Carolina State’s Alumni Association with an Outstanding Research Award (1985) and held the Reuben B. Robertson Professor of Pulp and Paper from 1990-2005.

Dr. Richard B. Phillips

In 2002, Dr. Richard B. Phillips, Executive in Residence, was elected for his work at International Paper as a manager of chemical process technology, and Vice President and Director of process technology. He managed research and development, product development, engineering, and mill technical services for over 32 years. When he retired in 2006, he joined the Paper Science and Engineering program at NC State where he has taught classes, supervised graduate students and research projects, and contributed his financial and engineering skill to a wide variety of pulp and paper, and bioenergy projects.

Dr. Hasan Jameel

In 2007, Dr. Hasan Jameel, Ellis Signe Olsen Distinguished Professor, was elected for his exceptional contributions to pulping, bleaching and recycling. He worked for International Paper for 8 years where he led the installation of the first commercial MC bleaching system, and studies on ECF bleaching and pulp yield. At NC State he studied chlorine dioxide bleaching, pH profiling and methods for controlling metals profiles. He also led the development of the distance education master’s program in Paper Science, the first of its kind, which still provides educational opportunities to students from around the world.

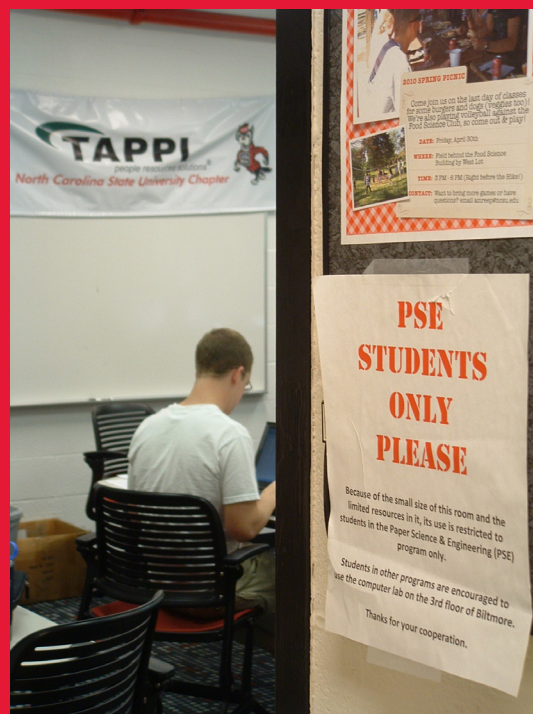

In 2005, he won the TAPPI Pulping Division Technical Award and the C.F.C. Richter Prize for outstanding contributions. He also won the Wetherhorn Prize for his contributions to pulping and bleaching processes. He has also been selected as a NC State Outstanding Teacher (1990, 2005) and as a NC State Outstanding Advisor (2006).

Dr. Martin A. Hubbe

In 2010, Dr. Martin Hubbe, Professor and Buckman

Distinguished Scientist, was elected for his contributions to the charge-related properties of fiber furnish, development of the science and technology relating to paper dry-strength, optimization of retention aids, and chemical process to promote dewatering. In these areas he has achieved international recognition as an innovative researcher and an important contributor to the development of fundamental science and applied technology.

Hubbe has provided meritorious service to TAPPI including contributions as the Director of the TAPPI courses “Introduction to Wet End Chemistry” and “Cost Saving Strategies in Papermaking Chemistry” from 1999 to 2005. Realizing the considerable cost of both presenting and attending an off-site course, Martin Hubbe helped convert the latter course material into a text-book that is now available through TAPPI Press. Starting in the 1990s, and continuing through the present, he served on the Papermaking Additives Committee of the Paper and Board division. Through this committee he has served twice as a conference track manager, multiple times as a session chair, and has also made scientific presentations at numerous conferences.

* Deceased

Katie Payne (left) and Michelle Blood (right) in front of Rayonier Fibers Mill in Jesup, Georgia

"I joined PSE in 2008 after being recruited at a dinner in West Point, Va. The energetic Med Byrd spoke about the "Golden Ticket" dual degree of Paper Science and Chemical Engineering. I was sold, accepting a full-ride scholarship. I have taken advantage of many opportunities ever since - 3 summer internships (the first in Mississippi after my freshman year earned me enough money to be nearly self-sufficient!); a \$12,000 scholarship to study in Europe for a year (taking classes that counted towards my graduation!); and a paid research opportunity with a PSE professor. I am always amazed at how much time and effort the teachers and staff invest into making sure that we are educated, well-rounded students. Because of the paper science and engineering program at NC State, I have a great education, real experience, and many friends!"

- Katie Payne

I would not be where I am today without receiving a Foundation scholarship. The scholarship made it possible for my family to afford out-of-state tuition so I could earn the PSE degree. I have been working in the paper industry for about 7 years now and can honestly say that I love my job! I look forward to many more years in the industry, and am very thankful for the opportunities the program has given me! This is why I set up a scholarship fund immediately upon graduation - to show my appreciation and give back to the program!

President David Hickman called to order the Pulp and Paper Foundation Board of Directors at 4:30 pm on October 13, 2011. He welcomed board members and guests and reminded everyone of the Foundation's antitrust policy. He also noted that the only action item on the agenda is the election of officers and directors.

Minutes from the previous spring 2011 board meeting were approved by unanimous consent.

Dr. Steve Kelley, Department Head, then provided a quick update on recruiting and scholarships: permanent jobs for students are still plentiful and the number of entering freshmen is at a comfortable level. Although total costs of a college education at NC State continue to increase while the value of the scholarship has remained flat, the number of students recruited from on campus has more than offset the loss in students from traditional mill towns. Comments from various board members indicated a desire to maintain the regionality of the program.

Mr. David Ashcraft, executive director of the NC State Natural Resources Foundation, reported on the progress in obtaining pledges from Members of the Committee of 100 – friends and alumni whose five-year pledge to give \$1,000 per year to Paper Science scholarships. He reported that the cash available to the Foundation totaled \$445,738. The projected income from endowment spending accounts available for scholarships during the current fiscal year is \$175,000.

By unanimous consent the board elected the following officers:

President:	Dr. Ronnie Hise
Vice President:	Mr. CA McDonald
Acting Secretary:	Ms. Patti Woodbury

The following were elected as rotating directors:

Mr. Gus Cottros	2012
Mr. Bob Harley	2012
Mr. Gray Carter	2013
Mr. Rob Quarles	2013
Ms. Cindy Hendren	2014
Ms. Jan Morgan	2014

Incoming President Hise reviewed operating guidelines for the Foundation and asked for volunteers to serve on various committees to update committees as well as reset the Foundation's mission and vision. He asked the committees to meet the following day and to make their first report at the spring 2012 board meeting with a follow-up report at the fall 2012 board meeting.

Incoming President Hise adjourned the meeting at 5:40 pm.

*Minutes recorded by:
David Ashcraft*

Dr. Ronnie Hise, president of the NC State Pulp and Paper Foundation Board of Directors called to order the spring 2012 business meeting at 9:00 am on March 23, 2012. He welcomed board members and guests and reminded everyone of the Foundation's antitrust policy. In addition to Dr. Hise, board members attending the meeting included Mr. Gray Carter, Mr. CA McDonald, Dr. Steve Kelley, Mr. Tom Corey, Mr. Bob Harley, Ms. Jan Morgan, Mr. Gus Cottros and Mr. David Hickman. Board members participating by phone included Ms. Rebecca Leitch, Mr. Lou Boos, Mr. Rex Robertson and Ms. Cindy Hendren. Guests attending included Ms. Patti Woodbury, Dr. Adrianna Kirkman, Dr. Med Byrd, Dr. Ernie Alexander and Mr. David Ashcraft.

Dr. Byrd updated the board on the accreditation process and requested feedback on the Paper Science Program's Education and Learning Outcomes. After discussion, and questions and answers, Mr. McDonald made a motion with a second by Mr. Carter to approve the PEO's and PLO's as written.

Dr. Byrd then led a discussion of potential modifications to the curriculum. A senior level course (PSE 465) will be revised, and Dr. Byrd offered several suggestions on what the changes might include – a focus on decision-making tools, or an emphasis on primary paper products or an emphasis on environmental impact and life cycle analysis. Dr. Kelley suggested that the program could trial the College of Textiles "tools course" this fall to determine if PSE would offer a similar course in 2014. Dr. Byrd invited board members to send comments regarding the proposed changes in the curriculum to him.

Drs. Byrd and Kelley then updated the committee on students enrolled in the program and also the actions taken by the Recruiting and Scholarship committee at the February 2012 meeting. Dr. Hise commented that the Executive Committee had provided guidelines to the Recruiting and Scholarship Committee meeting prior to the February meeting and that this practice would continue. Student statistics include:

132 students enrolled
52 students in PSE 201
57 new scholarships offered, including
 transfers from on campus
 in-state
 out-of-state

Overview of the University, College, Department and PSE Program by Dr. Steve Kelley:

The NC State task forces on 'Academic Science Programs'

(<http://www.provost.ncsu.edu/governance/task-forces/academic-science/2011/as-2011.php>) and 'Review of Academic Programs' (<http://www.provost.ncsu.edu/governance/task-forces/academic-program-review/2011/index.php>) are both making progress and there do not appear to be any real concerns for the College or PSE program. The 'Academic Science Programs' task force could have recommended merging Colleges or Departments to improve the educational and research quality of the University's 'science' programs. The task force has made a number of recommendations to the Provost but none that negatively impact the College. The Provost has not made any final decisions on their recommendations.

The 'Review of Academic Programs' task force is looking at numeric measures of the productivity and impacts of different Departments. Their initial report shows that the Department of Forest Biomaterials is small, but the PSE program remains very strong. Areas of particular concern include the time it takes to graduate (due to internships and co-ops), a high cost per Student Credit Hour (due to the small classes), and low per faculty graduate student productivity (due to a high number of post-doctoral associates). The Department has responded to this report and has plans for improvements and/or good justifications for areas of concern.

Dean Bob Brown's retirement will be effective July 1, 2012. The Dean Search Committee, appointed by the Provost, has scheduled airport interviews during early April and on-site interviews for the finalists no later than the first week of May.

Dr. Dan Robison, associate dean of research, has been named the Dean of the College of Natural Resources, Design and Agriculture in West Virginia. Dr. Joel Pawlak, Paper Science and Engineering faculty member, has been named Interim Associate Dean Research for one year. The plan is to cover his PSE 212 class with other PSE faculty and his PSE 465 class will be covered by a statistical analysis class for one year.

A new Director Recruiting/Industry Relations will be hired to strengthen Paper Science's relationship with industry, increase annual giving and recruit high school students and assist Dr. Byrd in on-campus recruiting. The new person will report to Mr. David Ashcraft, Executive Director of the NC State Natural Resources Foundation, but will be officed in the Paper Science area in Robertson.

Subsequent to the board meeting, the new position was advertised in TAPPI and in an email blast to Paper Science friends, and the number of applicants increased to 37. There

was general discussion regarding the salary level and how much the foundation could afford to pay for the position. Compensation plus travel is projected to cost \$100,000 per year or about 50% of this year's gifts.

Permanent jobs continue to be plentiful but additional summer internships are needed to provide summer employment for the larger number of students now in the program.

Mr. Ashcraft reviewed the financial condition of the Paper Science program; the current balance in the department's restricted accounts totals \$440,000. He reported that the Foundation is now at the \$100,000 per year level; at the end of four years the total annual scholarship spending will be \$400,000 per year. In addition to the additional spending on scholarships, the Foundation will increase spending for the new Director position by \$75,000 per year. The new Director is expected to increase fundraising during this same four-year period to increase the additional expenses. Mr. Ashcraft agreed to provide a detailed four year projection of cash flow, including numbers of students prior to the fall meeting.

Ms. Jan Morgan presented the report from the ad hoc committee on Scholarship Funding (Cindy Hendren, Tim Corey, Jan Morgan and Jack Lowdermilk.) The committee recommended:

- Publicize the new online giving site
- Better definition of benefits associated with giving
- Quarterly contacts with alumni, including one hard copy newsletter

Recommendations from this committee will be turned over to the Member Development Committee. Mr. Tim Corey agreed to be the chair of the Member Development Committee.

Mr. CA McDonald presented the report from the ad hoc committee on Recruiting Out-of State Students (OSS). The committee has identified a couple of companies that may be interested and capable of providing additional funding so that a full ride scholarship may be offered if the Foundation provides \$7,500. This committee's recommendations will be turned over to the Scholarship Committee for implementation. Ms. Rebecca Leitch is the current chair of the Scholarship Committee.

The PPF and PSE program continue to work to increase OOS enrollment. This includes a few full-ride scholarships and several enhanced scholarships (\$5,000). After the state legislature approves the state budget for the 2012-2013 fiscal year we should know if the OOS tuition waiver for academic scholarship students will continue to be honored. If this is the case we might want to increase our OOS full-ride commitments. The OOS waiver is worth about \$12,834 for the current year,

but also constitutes a \$38,473 liability for EACH full-ride OOS if the NC legislature were to remove this waiver. Thus the PPF and PSE program have to move carefully to limit the potential liability until the state budget stabilizes.

The Development Office and PPF members will continue to explore options for individual mills to create full-ride OOS scholarship packages that can be used to attract students from mill locations.

Dr. Alexander reported for the ad hoc Committee on Committees:

Recommended permanent committees include: Member Development, Scholarship, Recruiting, Intern/Summer Employment and Program Advisory

Discussed whether or not to have a specific Curriculum Committee (PSE Program Advisory Committee) or allow the full board to function as the committee. A decision on the need for the committee will be made at the fall meeting.

Follow up actions required for the committees:

- "Responsibilities" for approval at the fall meeting
- Chair, Vice Chair and members for each Committee
- Decide if Committee chairs and or members must be Members of the Foundation

Ms. Patti Woodbury reviewed plans for the fall 2012 Annual Meeting:

Wednesday
Industry Day

Thursday
Committee and Board meetings, Women in Paper Science and Social and Banquet

Friday
Golf

Saturday
Pig Pickin' Tailgate and Football

The new Director will have the responsibility to coordinate the Annual Meeting and all activities.
